Game

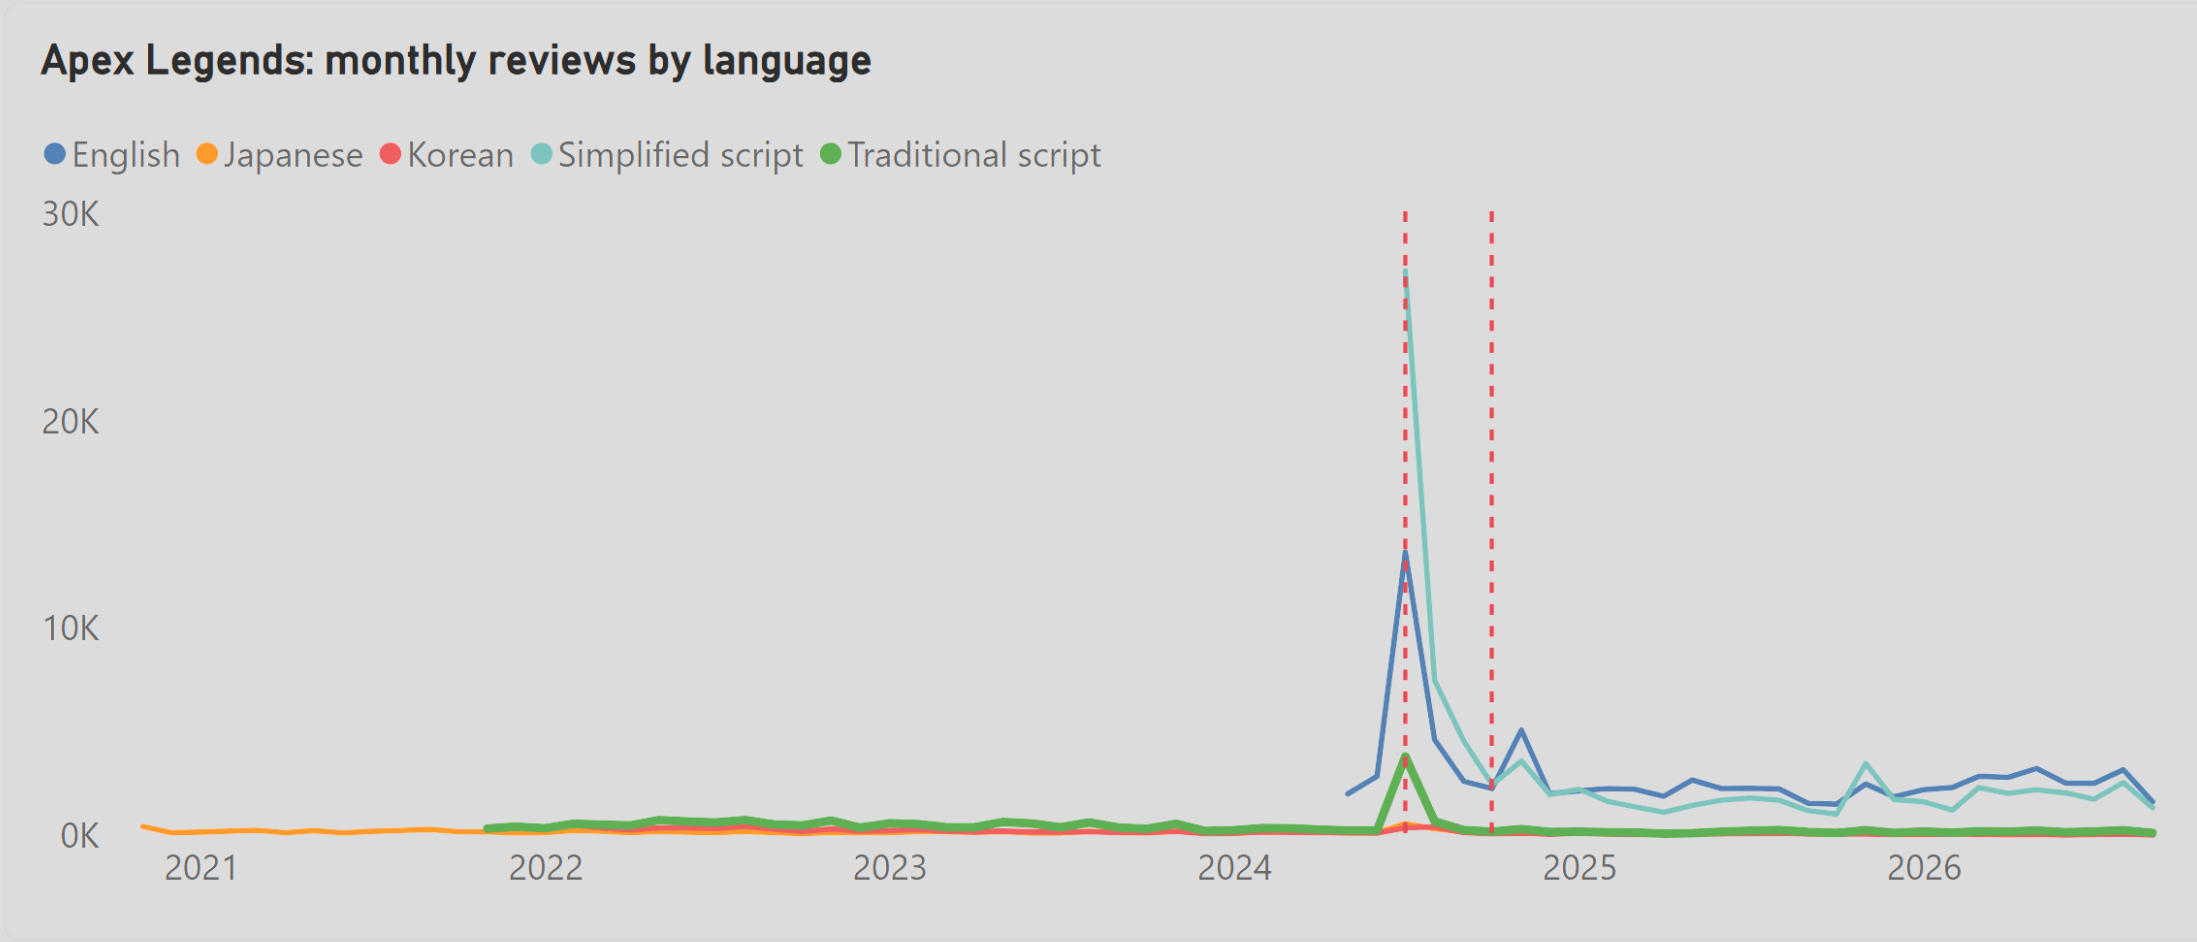

Apex Legends

Apex Legends has the widest Traditional script gap of the 14 games: 76.6% positive in English against 40.1%. Use the game filter to compare other games.

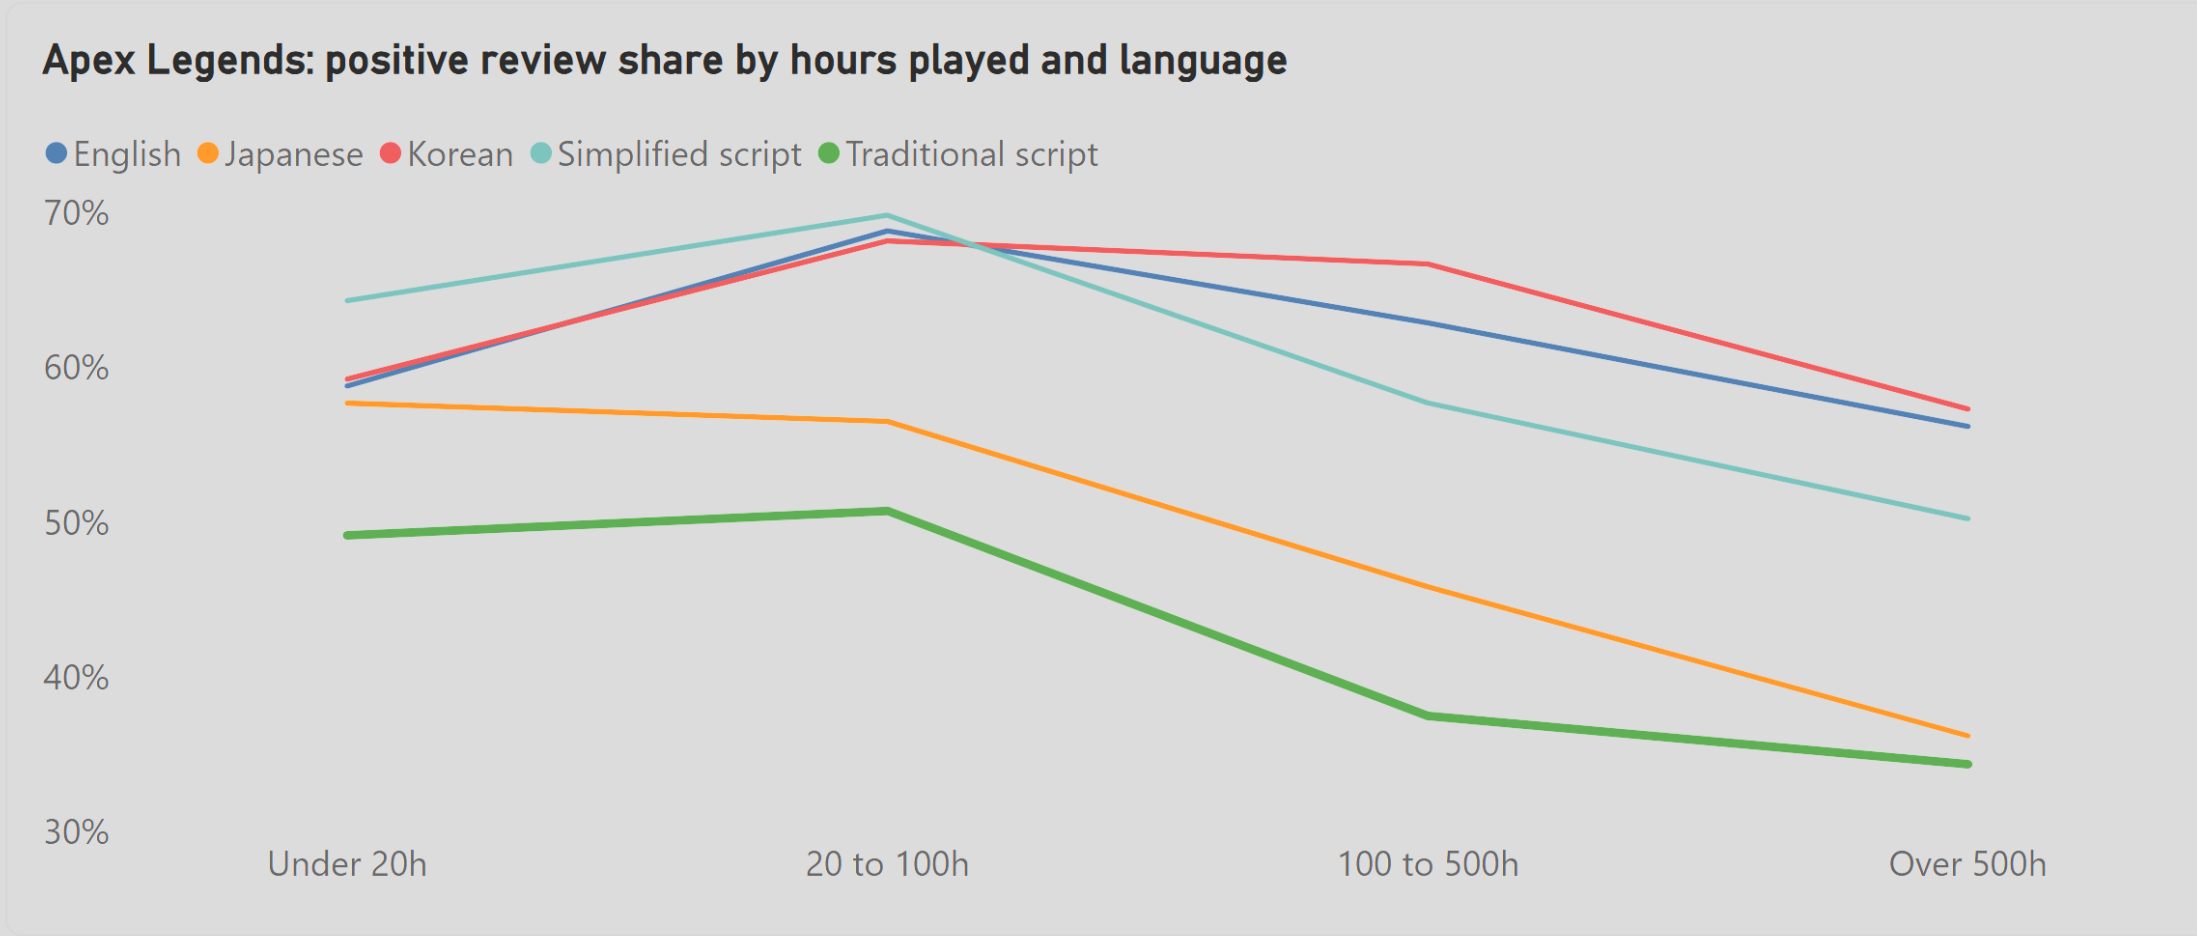

Positive review share by language (selected game)

Game	Language	Positive Share	Gap vs English
Apex Legends	English	76.55%	0.0
Apex Legends	Japanese	50.05%	26.5
Apex Legends	Korean	71.84%	4.7
Apex Legends	Russian	76.02%	0.5
Apex Legends	Simplified script	44.65%	31.9
Apex Legends	Traditional script	40.06%	36.5

In July 2024 every language spiked at once. Simplified script reached 27,227 reviews in one month, at 8.8% positive. The dashed lines mark July to September 2024, which are excluded from the comparison.

English players warm up (58.8% positive under 20h, 68.8% at 20 to 100h). Traditional script falls from 50.7% to 34.4% and Japanese from 56.5% to 36.2%, so the gap grows with hours played.

Apex Legends reviews: from 218,380 collected to 114,739 analysed

Step	What Was Done	Rows Before	Rows After	Rows Removed
1	Reviews collected from the Steam API (Apex Legends, 5 languages)	218,380	218,380	0
2	Keep only the window all five languages cover	218,380	169,612	48,768
3	Exclude the review-bombing months (July to September 2024)	169,612	114,739	54,873
4	Widen the connection-complaint keywords to include 斷線 (Traditional script negative reviews)	354	371	-17

Nearly half the reviews (47.5%) were removed before any comparison: 48,768 by the shared time window and 54,873 by the July to September 2024 review bomb. Step 4 counts a different thing, negative connection-complaint reviews, so its -17 means 17 more were matched, not lost.
